

Nova East Wind

NOVA EAST WIND

Canada's First Floating Offshore Wind Project

Project Partners

Together, DP Energy and SBM Offshore have a wealth of expertise in the renewable energy, and offshore construction and operations fields. Both companies have significant experience working in Nova Scotia advancing the offshore energy transition.

DP Energy is a leading renewable energy developer with over 30 years experience.

Key Points

-  A 300-400MW floating offshore wind project that will contribute to Nova Scotia's climate action targets.
-  Nova East Wind will generate clean renewable electricity for Nova Scotians, contributing to the Province's 2030 decarbonization goals.
-  Nova East Wind is a stepping stone project that will kickstart an exciting new ocean industry offshore Nova Scotia and Atlantic Canada.
-  Safely harnessing Nova Scotia's offshore wind potential utilizing the better wind speeds available offshore.
-  Project partners DP Energy and SBM Offshore have direct and successful experience creating renewable energy projects and in offshore construction and operations using sustainable and environmentally responsible methods.
-  Environmental surveys are currently underway within the project area and surrounding buffer zone identifying and recording species in detail.
-  Stakeholder and community engagement will continue throughout the duration of the project.

Nova East Project Location

The area under investigation for the proposed wind farm project is outlined in the map below. Aerial Surveys have been taking place since October 2022. Extensive indigenous and fishing stakeholder consultations will help determine the final site selections.

Our Commitment to Indigenous Communities

DP Energy and SBM Offshore acknowledge that our offshore wind project will be located in Mi'kma'ki, the traditional territory of the Mi'kmaq people. Since 2013 the Mi'kmaq have been a major contributor to the province's renewable energy program which in turn makes the indigenous communities an even stronger economic participant in the sector.

DP Energy and SBM Offshore both have a history of developing and constructing projects that have included indigenous partnerships. We strive to build on our indigenous partnerships to ensure their economic potentials are understood and fulfilled to the best of our abilities.

We are also committed to working alongside indigenous communities to ensure their environmental and cultural values are recognized and their traditional knowledge respected. We strive to develop our projects in a manner that respects the traditional knowledge, cultural heritage, and natural resources of the Mi'kmaq people.
